Inspection Memo
to Coal File:

RE: Joseph Harvey
CEP/007/02A
Carbon County, Utah

On July 27, 1982 Mr. Joe Harvey on behalf of Brigham Young University submitted to the Division a Notice of Intent to commence exploratory drilling. This submittal was responded to in a letter from Thomas N. Tetting dated August 26, 1982 approving the project with a few concerns.

On August 24, 1983 DOGM field specialist Ken Wyatt conducted an inspection of the proposed drill area. Several holes had been drilled directly on the Burnt Tree Fork road. The casing was discernable on the road. No drilling activity occurred up the left Fork as evidenced by the unimproved road conditions. Vehicle access was not possible. Very little reclamation work was required due to the location of the drill holes.
